

Reclaiming Horse History

Old World Timber's **Racehorse Oak** is milled from reclaimed oak horse fencing sourced from farms throughout central Kentucky also known as "The Racehorse Capital of the World."

This collection offers a refined character, a clean finish and unmatched story that can only be found in our reclaimed wood. The character of these timbers is extremely unique as the paddock fencing is exposed not only to the elements but to the rubbing and chewing of the horses who live within them.
